OP214

CLASSIC SHAPE. REFINED DETAILS.

Design Concept

OP214 crafted from translucent glossy dark green TR90 material, this oversized square optical frame features slightly outward-flaring rim corners to deliver a distinctive cat-eye square silhouette that sharply modulates facial contours. The integrated temples adopt the same transparent emerald tone as the front frame to maintain unified visual harmony; embedded metal hinges enhance structural stability while keeping the frame lightweight and resistant to deformation, which is a core advantage of TR90 material. Ergonomically curved temple tips fit naturally around the auricle to reduce pressure during prolonged wear. The broad lens aperture allows ample space for prescription lens fitting, blending elegant retro temperament with modern daily versatile styling.

OP213

CLASSIC SHAPE. REFINED DETAILS.

Design Concept

OP213 The front frame is integrally molded from high-gloss black lightweight TR90 material, adopting classic double-bridge pilot square silhouette with a hollow triangular cutout on the upper bridge, which delivers distinctive minimalist detail while cutting down frame bulk. It features a hybrid structure combining TR90 front rim and slender polished gold metal temples, greatly lowering overall load and bringing excellent toughness and anti-break performance unique to TR90 material. Curved matte temple tips fit the auricle ergonomically to prevent slipping during daily wear. The widened lens frame modifies facial contours well, applicable for prescription lenses and fashion decorative eyewear, merging retro aviation styling with contemporary casual aesthetics.
